

ABOUT PI-SIMS:

Pi-Sims was created to bring Performance Excellence Training into the 21st Century. The foundation is built on a need in the market for a simulation that emulated many of the training games that were being played in the classroom using paper forms, building blocks and other non – digital materials. Realizing that these games needed to be digitized for the globalized world, Pi-Sims was founded with the intention of offering an easier, more efficient way of training.

ABOUT DEL-SIM (DELIVERY SIMULATION):

The first simulation game has been branded Del-Sim. It is a multi-player online tool focused on simulating a delivery process within a company, with all the quirks and wastefulness that come with it. Players are given a job in Del-Sim Co and asked to execute it. They quickly discover that the inefficiencies are many and need to work together as a team to conquer the over-runs and challenges of the company. What makes this unique from a standard process analysis simulation is that it can be played simultaneously with players across the globe or in a classroom behind a screen. This replicates a more realistic method for solving problems in the 21st century.

GAME GOALS:

Del-Sim's intended outcome is to lead your team down a path of efficiency. Through playing the simulation, your students develop an astute eye for LEAN and the methods around it. Del-Sim is intended as the launching pad for your program's success and a tool to help you train staff on a global basis.

This simulation is intended to develop the following skills:

- ✓ Team building
- ✓ Structured improvement discussions
- ✓ Mapping out processes
- ✓ Identifying bottlenecks
- ✓ Analyzing data (and acting on the information)
- ✓ Task flexibility
- ✓ KPI Improvements & winning

COMPANY BENEFITS:

- ✓ **Global** – Multi-languages available
- ✓ **Remote** – can be played anywhere (travel savings)
- ✓ **Flexible** - Class size can range between 6 -15 players
- ✓ **Quick to start** - Easy set-up for any number of players and teams
- ✓ **Complimenting** - Built to work effectively with a wide array of internal trainings
- ✓ **Data Driven** – Wide variety of downloadable data for analysis
- ✓ **Engaging** - winning requires much effort and skill with multi-layered built-in inefficiencies and “hidden rocks”

COSTS & ADDITIONAL SERVICES:

Pi-Sims offers a variety of packages to adapt to the needs of your business. Next to the simulation, we offer additional services including in person simulation facilitation or train the trainer courses. It's always possible to create a bespoke package for your business.
