

ABOUT PI-SIMS:

Pi-Sims is a key partner for any company wanting to bring their educational programs to the next level. The foundation is built on a need in the market for training that better emulates the working processes of today, generating data and a safe testing environment for participants to grow and learn. Pi-Sims is a new way of learning.

ABOUT DEL-SIM (DELIVERY SIMULATION):

The first simulation game of its kind has been branded Del-Sim. It is a multi-player online tool focused on simulating a delivery process within a company, with all the quirks and wastefulness that come with it. Players are given a job in Del-Sim Co and asked to execute it. They quickly discover that the inefficiencies are many and need to work together as a team to conquer the over-runs and challenges of the company.

GAME BENEFITS:

Del-Sim's intended outcome is to lead your team down a path of efficiency. Through playing the simulation, your students develop an astute eye for LEAN and the methods around it. Del-Sim is intended as the cornerstone of your program's success, providing consistent and disciplined tool to train your staff on a global basis.

This simulation offers the following benefits and training methods:

- ✓ Structured Improvement Discussions
- ✓ Mapping out Processes
- ✓ Identifying Bottlenecks
- ✓ Analyzing Data (and acting on the information)
- ✓ KPI's, Data and P&L's in Real Time
- ✓ Winning through Profit Maximization
- ✓ Flexibility (in Positions & People)
